

OFFSET PALLET-RACK SAFETY NET SYSTEM

ABSTRACT OF THE DISCLOSURE

5 A material-rack system comprises an offset safety netting, a perimeter cable suspension system for the netting, offset brackets to anchor the perimeter cable suspension system away by adjustable amounts, and vertical extension posts that bolt to the face of the upper frame parts of a pallet rack. The curtain netting is supported around its edges by attachments to taut wire ropes that are supported by the offset brackets. Such offset brackets slip over the vertical frame parts of the pallet rack. The brackets are always flush ended with the netting, and include several mounting points for the frame attachment.
